■ GENERAL DESCRIPTION

Available either in through-hole or surface and T25 mount packages, the BTA/BTB 24-25-26 triac series is suitable for general purpose AC power switching. They can be used as an ON/OFF function in applications such as static relays, heating regulation, water heaters, induction motor starting circuits...or for phase control operation in high power motor speed controllers, soft start circuits...

By using an internal ceramic pad, the BTA series provides voltage insulated tab (rated at 2500V RMS).
